- 9: upload gps location
- 10: not implemented
- 11: send sms to target
- 12: nothing
- 13: start activity ActivityGetCC
- 14: upload call log

The screenshot shows a mobile application interface with a black background. At the top right, there are icons for Wi-Fi and battery. The main heading is "Enter credit card number" in white text. Below this, there are three logos for credit cards: VISA, Maestro, and AMERICAN EXPRESS. A large white input field is positioned below the logos. Further down, there are two input fields for "exp date" (with a slash separator) and "cvc2". At the bottom, there is a "Verify card" button. A faint "Google play" watermark is visible in the background. A small yellow warning triangle icon is present next to each input field and the button.

Upload or card information to C&C server.
