Send: Imei, pkg, ...
Receive: command

Install another application (can be silently).
Based on you browser app, set bookmarks.
Syphon device logs.

If the command said display download.
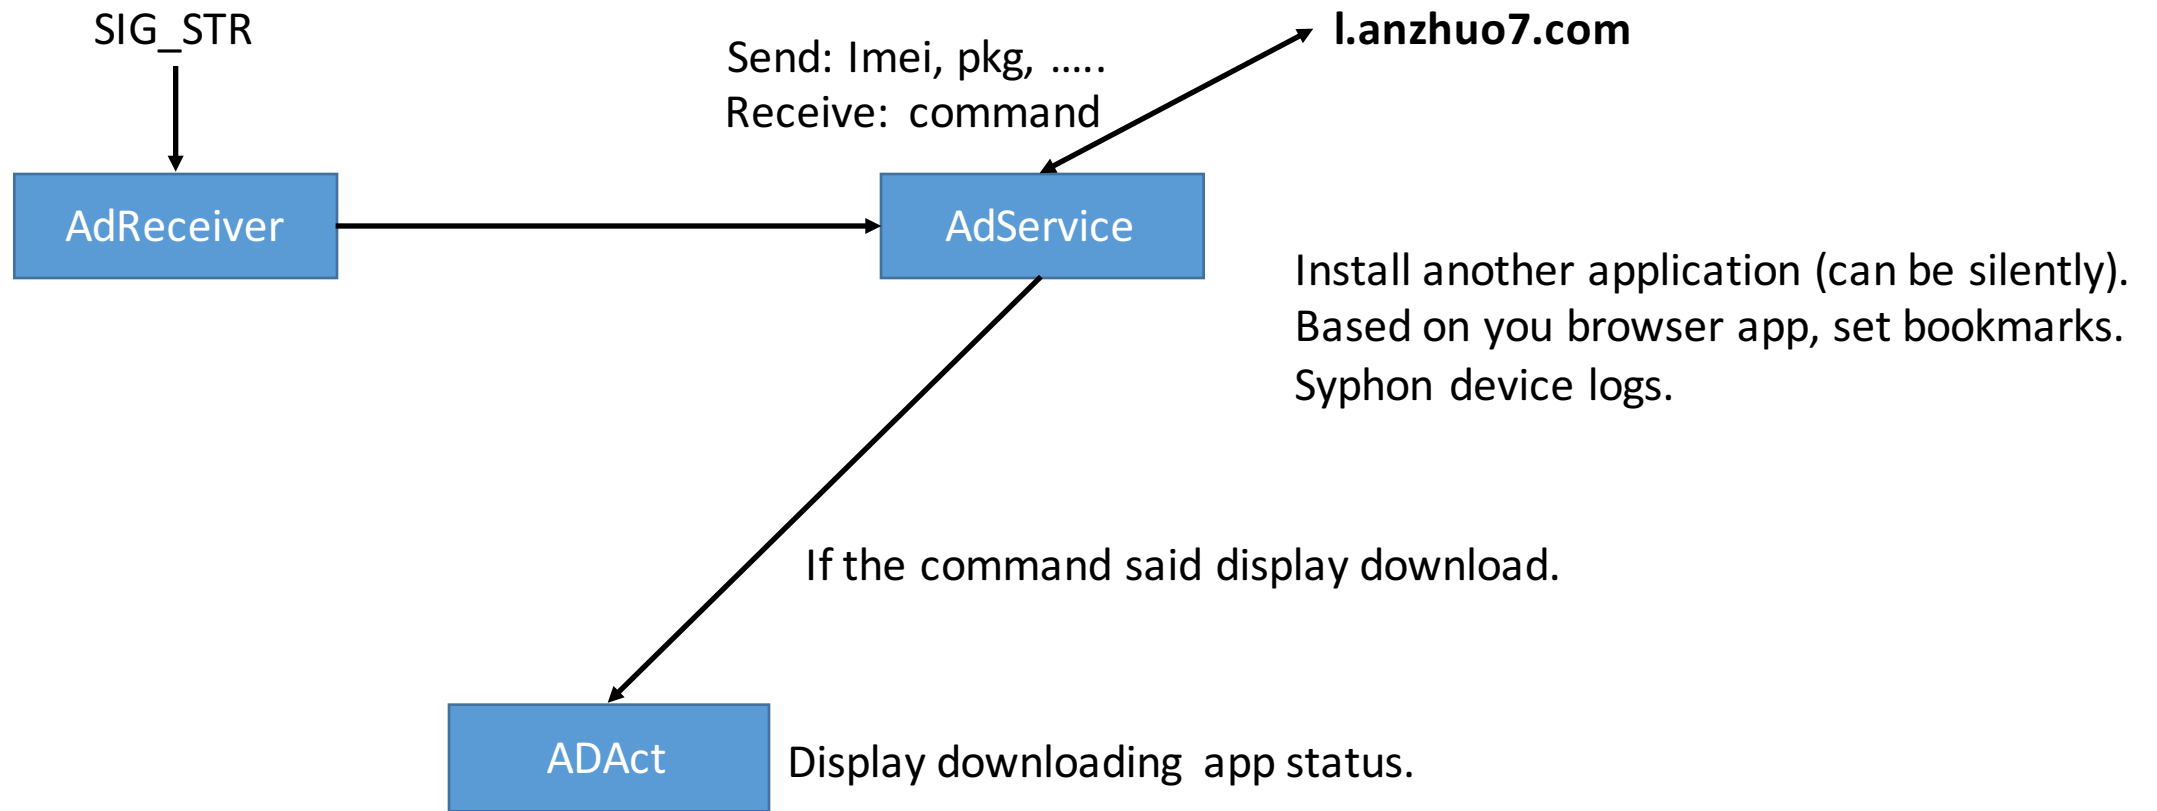

```
                    ADAct
```

Display downloading app status.

The Trojan's name stems from the fact that these two variants store their settings as 'i22HK', while the com.i22.* packages are associated with the popular Angry Birds application.
